

MOBILE PROTECT & CONNECT

FAST TO MARKET PROTECTIVE SOLUTION TO COMBINE YOUR CHOSEN MOBILE PAYMENT + COMPUTING DEVICES

Mobile Protect & Connect from Havis is the fastest, simplest and most flexible way to pair your chosen mobile payment and computing devices. Versatile, lightweight and compact, Mobile Protect & Connect solutions are ideal for mPOS use cases across a wide range of industries including Retail, Hospitality, Leisure and Healthcare.

Through an additive manufacturing process, Havis can deliver custom mPOS solutions which are not only affordable but which also have fast TTMs and low MOQs. All Protect & Connect cases are extremely easy to install; no tools are required, simply snap the devices into place. The case also allows for quick and simple disconnection to allow each device to be used, stored and charged individually.

- Create a custom mPOS solution tailored to the unique requirements of your business and industry
- Additive manufacturing process allows for a fast time to market and a low minimum order quantity
- Lightweight solution with a rugged zero-depth design which adds minimal thickness to the overall stack
- Unhindered access to all functions and features on both devices including charging and data ports
- Protection provided on all corners and sides to reduce damage from accidental drops (wrist strap provisions also provided)
